

CONSOLE INFORMATION SERVER SYSTEM AND METHOD

ABSTRACT OF THE INVENTION

5 A system and method for storing console information  
includes a plurality of computing devices, each computing  
device having a respective console, and a respective  
console interface. Each console interface may be  
operable to transmit console information associated with  
the respective console. A console server having a memory  
10 module may be coupled for communication with the  
plurality of computing devices. In a particular  
embodiment, the memory module may be operable to receive  
and store at least a portion of the console information.
